

HOW TO GET INVOLVED

@realmofcaring

NEED SUPPORT?

Our dedicated CARE team is here for you with one-on-one educational support for cannabinoid therapies via appointment, email, or phone call.

Realm of Caring Foundation

Because Quality of Life Matters

ABOUT US

RoC is a nonprofit agency dedicated to encouraging mainstream acceptance of cannabinoid therapies. We provide educational resources and support, and we're actively involved in research to advocate for policy change.

RESEARCH

We're currently running three IRB approved studies, with more big things on the horizon! Check out the other side for the deets.

EDUCATION

We have tons of resources that are completely free to access! Check out our weekly blogs, resource pages, and our continuously expanding Research Library.

OUR RESEARCH

OBSERVATIONAL RESEARCH REGISTRY

Our ongoing study examining health effects of cannabis use.

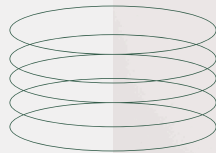

FEMALE VETERAN STUDY

Female veterans are underrepresented in cannabis research, so we're giving them a voice in this prospective study examining health outcomes of cannabis use.

FUNCTIONAL MUSHROOM STUDY

We're collaborating with other nonprofits, Unlimited Sciences & Lily's Lighthouse, to start the conversation on the therapeutic potential of Reishi & Lion's Mane mushrooms for those with epilepsy in this retrospective study.

WHAT'S IN THE WORKS?

LONG-TERM CBD USE STUDY

We're addressing the need for data on naturalistic CBD use behaviors, dosing, and health outcomes in this retrospective study for long-term users.

THE CANNABIS & HEALTH RESEARCH INITIATIVE

RoC is collaborating with experts at Johns Hopkins University to examine the patient-level impact of therapeutic cannabis use through data collection and dissemination.

WHAT WILL THE IMPACT BE?

- ✓ Inform clinical decision-making
- ✓ Identify target areas for the development of cannabinoid therapies
- ✓ Steer policy and regulatory decisions in the interest of public and patient health

THE NATIONAL CANNABIS STUDY

This is our large-scale study that will be launched under the Cannabis & Health Research Initiative.
